

ISMART NO3+

NITRATE DIGITAL SENSOR PRODUCT SPECIFICATION SHEET

IOT application Features Supportive

Real Time Continuous Measurement

Built-In Temperature Compensation

The OXYSERIES (No3+ sensors) feature 3 Wire Adjustable Digital output high accurate upgrade measurement technology. Designed for most water applications,

Typical applications include:

Industrial wastewater Aquaculture & Tap water Agriculture RO & Beverages & Food Stuffs Environmental monitoring

The NO3 + Sensor gives you the options of output RS485, maximize sensor life. Sensors can be used in new installations with flow cell or immersion type, installed as a replacement for other 4-20mA output free Nitrate sensors (Consult with OXY SERIES for compatibility).
