

# Online Conductivity Meter ORP-350

## 01 Applications

This meter is widely used in waste water treatment-Pure water, Circulating water boiler water system and other industry of ORP online monitoring, such as electronic, Aquaculture, food, printing, electroplating, Pharmaceutical fermentation & chemical processes, as well as other environmental monitoring and remote power system applications.

## 02 Main features

- Automatic temperature compensation function
- Automatic identify standard solution liquid
- Optional online data acquisition software
- 1 channel 4~20mA current output
- Support RS485 communication
- 2 groups of ON/OFF relay control
- Memory storage function can store record
- Watchdog function
- Support IOT system Integration

CE ISO FC RoHS

## 03 Technical indicators

Measuring range:	-1999~+1999mV
Resolution:	1mV
Accuracy:	±1mV
Signal output:	RS485 and 4~20mA
Working conditions:	0~60°C
Working voltage:	AC220V±10%, 50/60hz or DC24V
Electrode cable:	5M
Installation:	Panel installation
Protection grade:	IP57

## 04 Optional accessories

Bracket

Flow cell
